- 3. To determine economic variables including inflation, unemployment, poverty, GDP, balance of payments using statistical methods.
- 4. To understand the behavior of financial and money markets and perform cost benefit analysis for making investments.

B. Sc. (Chemistry)

After completion of the programme, the students will be able:

1. Understand the central role of chemistry in our society and use as a basis for ethical behavior.

- 2. Provide foundation in the fundamentals & application of current chemical & scientific theories.
- 3. Impart skills in planning and conducting advanced chemical experiments & applying Structural-chemical characterization.
- 4. Prepare laboratory reports that provide a description of the experiment & reasoning clearly.
- 5. Identify, formulate, analyze & solve problems in the analysis of chemical compounds.

B. Sc. (Physics)

After completion of the programme, the students will be able:

- 1. To provide in depth knowledge of scientific and technological aspects of physics.
- 2. To familiarize with current and recent scientific and technological developments.
- 3. To enrich knowledge through problem solving, hand on activities, study visits, projects etc.
- 4. To train students in skills related to research, education, industry and market.
- 5. To create foundation for research and development in electronics.
- 6. To develop analytical abilities towards real world problems.
- 7. To help students build- up a progressive and successful career in physics

PG COURSE

M.A. Hindi

After completion of the programme, the students will be able:

- 1. Creative Writing
- 2. Comparing
- 3. Translation
- 4. News Writing5. Research

M.A. Economics

After completion of the programme, the students will be able:

- 1. Understand and analyze Consumer Choice Theories.
- 2. Analyze the Rationale for Public Policy & Theories

- 3. Study the Features & Effects of International Cooperation's
- 4. Analyze the Distribution & Welfare Economics theories5. Study the classifications & role of International Capital Flows

M.Sc Organic Chemistry

After completion of the programme, the students will be able:

- 1. Get and apply basic knowledge of the various aspects of Chemistry in real life situations.
- 2. Understand the experimental skills, designs and their implementation in novel synthetic methods.
- 3. Develop an aptitude towards academic and professional skills; understand the basic concepts of structural elucidation with hyphenated techniques in Chemistry.
- 4. Familiarize with fundamental biological processes and create rationale towards computer assisted drug designing.
